

# **JUST THE FACTS: DRUGS, VAPING, AND CULTURE**

## **Teens and Drugs; What do parents need to know**

Poudre High School is hosting a 3-night parent event to learn more about marijuana, today's teen culture, vaping and other substances. These nights will provide information on teenage brain development, substance abuse warning signs, and talking tips so that you can engage in open and honest conversations with your teenager.

Lauren Kiel is Poudre High School's Substance Abuse Specialist and a school counselor. She has worked with students and faculty on prevention and education and would love to share this information with families in effort to help keep our students healthy!
